

Dear Neighbors,

Thank you to everyone who attended last week's Council meeting and took the time to share your perspectives and your passion for the health of our lake. Civic engagement like this—thoughtful, informed, and deeply rooted in care for our shared home—is one of Pine Lake's greatest strengths.

I want to say clearly and with confidence that our entire elected body, myself included, along with our dedicated City staff, care deeply about the long-term health and well-being of our City and our environment. That commitment guides our decisions, even when the questions before us are complex.

I know concerns were raised regarding the recommendation for riprap, and I appreciate the residents who have reached out to me directly to ask questions and share their perspectives. Please know that those concerns are being taken seriously, and we are actively looking into the matter. I will report back as more information becomes available, and if remediation measures are needed, we will take those steps.

Finally, I'm pleased to share an invitation. City Manager Hawthorne and I will be hosting **Coffee at City Hall** on the final Friday of every month at **8:30 a.m.**, beginning **next week, January 30**. Please come by to sit, chat, ask questions, and sip coffee with us. These informal conversations are an important way for us to stay connected and hear directly from you.

Thank you again for your engagement, your care, and your continued investment in Pine Lake.

*With gratitude,*

**Brandy Hall**

*Mayor, City of Pine Lake*
